INDUSTRIAL & COMMERCIAL PORTABLE SHELTER & STORAGE SOLUTIONS

We at Southern Comfort Shelters are constantly striving to find better and innovative solutions for our customer's building and storage needs.

Our relocatable structures are versatile for temporary or long-term uses. With customized features such as single or double door options, garage doors, siding panels, flooring, and more, only a lack of imagination is stopping you.

INDUSTRY APPLICATIONS

- Store vehicles, boats, and aircraft.
- Cost-effective solution to off site storage and warehouses.
- Maximize usable space without center supports or beams.
- Create a temporary workspace.
- An emergency shelter or medical tent.
- Use as a lunchroom or gathering space.

OUR PRODUCTS

Clear Span Building

Our covered building structures have no interior beams or center supports to take full advantage of maximum storage or workspace.

Rapid setup provides quick and easy turnkey solutions for on site structural needs. Moving supplies to each location reduces travel time and increases profits.

Shipping Container Building

Portable container structures can be assembled quickly, disassembled, stored in the shipping container, and moved to the following worksite.

Container buildings are worksite to worksite solutions for your storage needs. This modular construction makes these buildings ideal for storing large construction equipment and materials.

Matador Blast Resistant Shelters

Our patent-pending innovative design allows worksites to have a temporary structure further within the blast zone and closer to main buildings.

A blast resistant construction makes the perfect lunchroom, storage room, or fabrication shop. The Matador can withstand up to 6 PSI blast load and maintain structural integrity.

Vinyl panels withstand 90 mph winds and Matador structures meet API RP 756 guidelines.
